Autoflame Service & Support

OFFERED EQUIPMENT

Autoflame Controllers | We specialise in Autoflame Combustion Controls, including the MK8 Series.

Limpsfield Combustion Burners | Renound in the industry for their guaranteed burner performance of 3% O₂ across the firing range.

Flue Gas Recirculation (FGR) | FGR utilises flue gases into the combustion process, thus reducing NO_x production whilst maintaining 3% O₂ and efficiency.

24/7 SUPPORT

24/7 Support | Our highly trained Gas Safe, combustion specialist engineers are on hand 24/7 so you always feel fully supported.

Stores | Our new warehouse means engineers are fully equipped with spare parts, components, and everything from wiring to fixtures to piping.

OUR TEAM

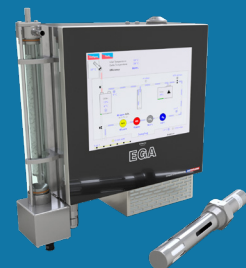

Experience | Servicing and representing the industry's most advanced boiler software packages and burner product ranges, all manufactured in-house by our team here in the UK.

UK-wide reach | Based in South London, we service the whole of the UK for maintenance, upgrades, and emergency call outs.

HIGHLIGHTS

- 3-Parameter Trim with the Mk8 EGA
- Increased Lifecycle of Equipment
- Compliance with MCPD
- Frequent Reporting
- Reliability
- Efficiency

REMOTE MONITORING

Through frequent reporting and data analysis via the Mk8 DTI, remote monitoring equips our engineers to:

- Maintain your site remotely
- Predict and diagnose problems efficiently
