

## ENVIRONMENTAL AND SUSTAINABILITY POLICY

**Autoflame Engineering Ltd** aims to reduce its environmental impact as well as ensuring sustainability of its operations and supply chain.

To achieve these goals, Autoflame Engineering Ltd is committed to:

- Comply with national and international environmental legislations that are relevant to our activities
- Minimize waste by careful assessment of operations and making appropriate changes
- Reduce the use of fossil fuel generated energy and switch to renewable sources
- Influence the design and manufacture our products in such a way as to minimise their environmental effects in their use and at end-of-life.
- Encourage its suppliers to reducing their environmental impacts
- Reduce light, noise and air pollution generated during operations
- Increase environmental and sustainability awareness of its staff through regular training
- Dispose any waste in a legal and safe manner
- Actively promote recycling both internally and our customers and suppliers

Autoflame Engineering Ltd is committed to establish and maintain an ISO 14001:2015 Environmental Management System.

All employees of Autoflame Engineering Ltd are required to give their full support to achieve the company environmental goals
